

Biogas Channel is the first and only web video channel dedicated to biogas in all its applications. Created in 2013 from an editorial initiative developed and endorsed by AB, the most important international company specialised in cogeneration, it has now been fully revamped, meaning it is more complete and functional.

This week Biogas Channel presents the Bioman Spa, a combined biogas and composting plant located in North-East of Italy. Look at the [video](#) about Bioman

Bioman treats up to 285'000 tpa of food- and green waste sorted by households and commercial activities. The facility is a member of CIC - the Italian Composting and Biogas Association and the compost is produced according to CIC's QAS on compost.

Currently Bioman produces Biogas for the needs of a 20'000 inhabitants city and soon will be link to a district-heating systems so to use the excess heat produced at the facility.
